

ADRIAN JUSTIN J. SALINAS

Full-Stack Developer · AI/ML Specialization · Technical Founder

ajsalinas005@gmail.com · +63 961 254 7821 · Iloilo City, Western Visayas, PH · [Open to Remote](#)
github.com/JustineSalinas

PROFESSIONAL SUMMARY

Full-Stack Developer with an AI/ML specialization and Technical Founder with a track record of shipping real-world systems including a QR attendance platform serving 700+ users and various hackathon-winning awards. Student Founder of Cascade Development Group (CDG), Iloilo.

Open to internships, part-time, and remote roles.

EDUCATION

Bachelor of Science in Information Technology · University of San Agustin

2024 – Present (3rd Year) · Iloilo City, PH

Cumulative GWA: 1.85 - Third Year Level

Head of Design · CAS (College of Arts & Sciences) · Web Development Lead · ITSA (IT Org) · Developer · ADS (Augustinian Developer Society) (School Org)

Senior High School (Gr. 11–12) · University of San Agustin

Sept 2023 – May 2024

Elementary (Grade 7 below) · Philippine International School in Buraydah, Saudi Arabia

July 2010 – May 2019

WORK EXPERIENCE

Student Founder & AI Engineer · Cascade Development Group (CDG)

2026 – Present · Iloilo City, PH · Remote

- **Cascade Development Group (CDG)** solutions startup delivering web development, database architecture, and technical consulting to clients across the Visayas operating with my team across the full business lifecycle from scoping to deployment.
- Developed **ready-made website templates** tailored to individual target businesses' industries and branding, spanning both local (**Iloilo/Visayas**) and **international markets**, to demonstrate capability before initial contact.
- Executed cold outreach to **20+ prospective businesses**, sending personalized emails with fully built demo website links — converting cold leads into warm conversations through tangible, ready-to-use proof of work. Architected and shipped end-to-end client solutions using Next.js, TypeScript, Supabase, and Vercel — owning the complete stack from schema design and REST API development to polished front-end interfaces.
- Designed and maintained the official CDG company platform (cdg-official.vercel.app) serving as a live product portfolio and **active client acquisition channel**.

Project Manager & Lead Developer · PharmaTrack — University of San Agustin, Pharmacy Department

2026 · Iloilo City, PH

- Lead a full-stack QR-based attendance system for **700+** Pharmacy students — eliminating all physical hardware dependencies and replacing manual paper-based processes entirely.
- Built a role-based access platform with three distinct portals (**Student, Faculty, Admin**) using Next.js 14 App Router, Supabase Auth, and PostgreSQL with **row-level security policies**.
- Delivered a **full Admin analytics dashboard** with CSV/PDF export, system-wide attendance logs, and user management providing department leadership with live operational visibility.

Solo Full-Stack Developer · 1st Runner-Up · Solmate / E-Ferry — Nexus Philippines Hackathon 2026

May 21–23, 2026 · Philippines

- Built **E-Ferry (Solmate)**, a web-based financial and telemetry dashboard acting as the digital brain for the E-Bangka bridging hardware IoT data with capital planning for electric ferry operations.
- Earned **1st Runner-Up at the Nexus Philippines Hackathon**: Hacking the Future of Energy, out of 17 teams nationally, with a fully functional, deployed MVP delivered in under 3 days.
- Integrated **real-time telemetry feeds** into a React/TypeScript dashboard using Recharts and MapLibre GL, demonstrating cross-domain ability across IoT, geospatial mapping, and financial analytics.
- Led end-to-end solution design under competition time constraints from architecture to live deployment on Vercel showcasing rapid prototyping and high-pressure delivery.

Solo AI / ML Developer · Team SOLMATE · 2nd Place Winner Marine-AI — National AI Fest Hackathon 2026

2026 · Philippines

- Built Marine-AI, a retrofittable **IoT and AI advisory system** for passenger boats, combining sensor telemetry with **predictive safety analytics**.
- Earned 2nd Place (National Open Professional Category) out of 24 teams, leading **AI/ML model development** using Python, ONNX, and XGBoost.

Project Lead / Smart Contract Developer · SplitRails Stellar APAC Regional Hackathon 2026 (Top 60)

2026 · Stellar APAC Hackathon

- Built a collaborative expense-splitting platform with on-chain escrow using the Stellar network, enabling trustless group payments.
- Shipped with Next.js, TypeScript, and Tailwind CSS managing both product delivery and smart contract development.

IT Assistant (Outsourced Contract) · Telus Corporation

March 2025 · Iloilo City, PH

- Set up, configured, and maintained computer systems and local area networks to ensure operational readiness across the organization.
- Resolved hardware and software issues efficiently minimizing downtime and ensuring continuous productivity for end users.

IT Support · InnovaThink Corporation Philippines - 200 Hour OJT

July 2024 · Iloilo City, PH

- Provided direct technical support for Windows desktop environments diagnosing and resolving system configuration, software, and network connectivity issues.
- Completed a formal Certificate of Completion in IT Operations, demonstrating professional proficiency across hardware support, system diagnostics, and network troubleshooting.

Technical Support Intern · University of San Agustin - 72 Hour Internship

January 2024 · Iloilo City, PH

- Deployed and configured network routers and infrastructure across multiple campus buildings establishing reliable campus-wide connectivity.
- Coordinated physical infrastructure rollout across departments, developing strong skills in network topology, cable management, and IT project execution.

CORE SKILLS & TOOLS

Languages & Frameworks: TypeScript · JavaScript · Python · Java · SQL · React · Next.js · Node.js · HTML5/CSS3

Backend, Data & Cloud: Supabase (Auth + PostgreSQL) · Firebase · Vercel · REST APIs · Clerk · PostgreSQL · MySQL · PLpgSQL

Design, Tooling & DevOps: Tailwind CSS · Git & GitHub · Notion (PM) · CDG Console (Developed a Personal Project Management Space)

PERSONAL PROJECTS

Tuón — AI-Powered Spaced-Repetition Study Platform · Solo Full-Stack Developer & Founder

August 2026 – Present

- Built **Tuón**, a production web application that turns pasted class notes into **AI-generated flashcards and practice quizzes**, then schedules every card with the SM-2 spaced-repetition algorithm.
- Architected the full stack on Next.js 16 (App Router) and React 19 with Firebase Auth, Firestore, and the Admin SDK, treating Firestore security rules as the real trust boundary rather than route guards — proven with 164 automated checks across 9 suites, including 51 rules tests run against the local emulator.
- Modelled the Philippine education system end-to-end — all four DepEd Senior High tracks, 24 college programs, and 27 PRC licensure exams — and extended the SM-2 scheduler with exam-date-aware clamping so board reviewers never have cards scheduled past their exam, a failure mode standard spaced repetition silently ignores.
- Shipped the entire production surface solo: an **offline-first PWA** (service worker plus persistent Firestore cache), per-plan rate limiting and generation quotas, Data Privacy Act compliance covering privacy notice, minor consent, data export, and account deletion, and continuous deployment on Vercel.

Commit — Developer Learning & Productivity Platform · Solo Developer

2026 · commit-beta.vercel.app

- Built a comprehensive platform designed to help developers learn, collaborate, and streamline their workflow — combining a Markdown code journal, task management, and Pomodoro focus sessions.
- Shipped with Next.js 15, TypeScript 5, Supabase, PostgreSQL, and Clerk auth — demonstrating full product ownership from UX design through backend engineering to live deployment.

BinSense — IoT Smart Waste Monitoring · Project Lead

2025 · [GitHub](#)

- Built an IoT solution that monitors bin fill levels using Arduino UNO, ESP8266, and sensor arrays — automatically optimizing waste collection routes to reduce unnecessary trips.
- Developed the Python data pipeline bridging sensor input with a web-based monitoring dashboard, demonstrating hardware-software integration across embedded systems and cloud backends.

Famly — Collaborative Family Financial Tracker · Solo Developer

2026 · [GitHub](#)

- Designed a dark-themed PWA tracking tuition assessments, savings milestones, debt ledgers, and family project proposals — solving a real household financial visibility problem.
- Implemented real-time Supabase sync for multi-device collaboration with PWA offline fallback, reflecting strong product intuition and self-driven initiative.

SignSync — Real-Time Sign Language Translation · Solo Developer

2026 · [GitHub](#)

- Built a **real-time sign language translation tool** using computer vision and machine learning to bridge communication gaps.
- Implemented with React.js, Python 3, and FastAPI for real-time inference and a responsive front-end experience.

CERTIFICATIONS

- **Project Management** – Waterfall & Agile · Udemy · 2026
- **Project Management 101 – DUAL Certificate** · Udemy · 2025
- **Design Thinking Guide for Successful Professionals** · Udemy · 2025
- **Certificate of Completion in IT Operations** · InnovaThink Corporation · 2024
- **AWS AI Practitioner** - Udacity · 2026
- **RAG Strategy & Execution: Build Enterprise Knowledge Systems** · Udemy · 2026
- **Advanced Scrum Master** · Agile Enterprise · 2026

ACHIEVEMENTS & RECOGNITION

- **1st Runner-Up — Nexus Philippines Hackathon: Hacking the Future of Energy (May 2026), out of 17 teams** — recognized for the E-Ferry/Solmate IoT-financial dashboard by an industry panel.
- **2nd Place (National) — National AI Hackathon 2026, Open Professional Category, out of 24 teams — AI Lead for Marine-AI, an IoT/AI advisory system for passenger boats.**
- Founded **Cascade Development Group (CDG)** at 3rd-year university level — a functioning IT solutions startup serving real clients.
- Delivered PharmaTrack for **700+** active users at an institutional university department — a production-grade system built as an undergraduate student.
- Maintained a **1.85 cumulative GWA** while simultaneously founding a company, shipping 6+ production projects, and competing in national-level hackathons.
- International educational background attended **Philippine International School in Buraydah**, Saudi Arabia (Grade 1–7), reflecting cross-cultural adaptability and global exposure.
